Pedrosa Natural Slate

Dark grey in appearance with a fine raised grain and wide dressed edges, Pedrosa gives the roof a very attractive, rich and natural appearance. The slate's appearance will surpass all expectations, and once fitted in accordance with good roofing practice will add value to any building.

When it comes to quality, Pedrosa is at the very top end of the slate market, giving the end user the satisfaction of having on their roof one of the very finest names in Spanish slate.

Galcar is dark grey in appearance with a fine raised grain and wide dressed edges, giving the roof a very attractive, rich and rugged appearance.

Galcar is available in 600x300mm format. Galcar Slates fully comply with EN 12326:1 and are A1, S1, T1.

Advantages of RILCO Natural Slate

Practical

Slate is exceptionally durable. It is unaffected by normal extremes of temperature and is highly resistant to chemical reaction. It retains its colour, even in UV light and is impermeable to water. It is non-combustible and is compatible with all other building materials.

Aesthetics

Combines beautifully with traditional and modern materials, adding character and quality to any building.

Proven Longevity

Centuries of history and has proven slate to be the highest quality roofing material on the market.

RILCO Roofing & Cladding is a specialist roofing distribution company based in North County Dublin. Backed by over 50 years of management experience in the supplying and selling of roofing materials, we offer technical support along with sample products and unbiased advice.

RILCO distributes only quality roofing materials including SVK Fibre cement slates, clay interlocking tiles, roof ventilation products and a range of decorative clay ridges to suit any roof. We give you all the facts about the best roofing materials to use in order to help you make that important decision. With a vast range of roofing products available we are confident we can help you make the right decision.
